It Will Derange a Ship's Compass at a Distance of Six Miles - Would Frove of Great Service in Time of War.

There is a big, twelve-inch gun standing on top of the ramparts at Willet's Point, says the New York Times. It is an innocent-looking gun, and a bis coll of telegraph cable wound around the muzgle end of the piece suggests that it has become fractured, and that the Government is experiment og with an economical method of repairing broken down ord-

ful electro-magnet in the world, except those of natures own construction, at the Imaginary points of the earth known as

Imaginary points of the earth known as the magnet poles.

The big magnet is the invention of Col. M. R. king commander of the engineer of the interesting experiments have been made with it. When Colonet king the electrod into of its possibilities. There entered into the construction of the tirst magnet two the construction of the tirst magnet two the construction of the tirst magnet two the good many miles of heavy insulated telegraph wire. The guns stood on carriages on top of the foit. The pieces of the cannon, and were held in place of the cannon, and were held in place by chains, ferrong a horse-snoe. The elegraph wire was weathed around the mazele ends of the guns, making two muzzle ends of the guns, making two minimense apoots. The current of ejectivity was supplied by a dynamo, and the first time the magnet was charged it developed marvellous power.

mediately the rails flew to the magnets and were held as fast as if they had been welded to its immense core. Colonel King then had one end of a large chain fastened around the pieces of fron, to assect ain the amount of power necessary to pull them away from the magnet. The other end of the chain was fastened to a capstan that was held firmly in place by long stakes driven into the ground.

When everything was in readiness for the test the capstan bars were manned by eight stallwart engineers, and they endeavored to pull the railroad iron away from the magnetized guns. After straining for some time, the stakes holding the capstan in place gave way, and it toppled over. The railroad iron had not even moved on the face of the magnet. The dynamenter which had been attached to indicate the amount of strain the magnet would stand, showed that it had resisted 22,500 pounds. It was found impossible to disturb the places of railroad iron until the electricity had been shut off.

Some time ago Colonel King caused to be made the one-gun magnet. Thirteen of ago Colonel King caused to be one sun magnet. Thirteen

valles of half-inch insulated telegraph scable was used in making the coil on the gun. Tests with this magnet showed that it possessed almost as much power as the first one, where two guns were used for the core. A number of a value of the work. as the lirst one, where two guns were used for the core. A number of exhibitions of the working of this electro-magnet were given before members of the American Society for the Advancement of Science. One of the exhibitions attracted a great deal of attention, as it best illustrated the power the magnet

to be the best exhibition of the magnet's power.

During a recent series of experiments an fron tray, heaped up with old horse-shoes, but fron spikes, muts, bolts, and other articles made of fron, was given to a soidler, and he was directed to hold the tray in front of him and walk toward the magnet. When the soldier arrived at a point about fifteen feet from the gun the contents of the tray departed with a rush and lodged on and about the muzzle of tip big gun. The soldier had all he could do to keep the tray from following the scrap fron.

This test has suggested the possibilities of hig electro-magnets being used to defend forts and earthworks from land attacks. A row of them of sufficient power would draw the smaller arms out of the hands of the infantry while the advancing column was still some distance from the place of attack, leaving the soldiers at the mercy of the garrison of the fort.

AN ELEGANT AFFIJR.

Wedding of Mr. Stewart Hune and Mira Norma Walker,

The residence of Major D. N. Walker, do Park avenue, was at \$39 o'clock on last evening, the scene of one of the most elegant home weidings of a senson which has abounded in them. The contracting parties were Mr. Bryce Stewart Hume and Miss Norma Walker, and owing to recent and severe affection in the family of the latter, the utmost simplicity was observed, and only near relatives and a semail number of very intimate friends witnessed the ceremony.

The parior decorations presented an exceedingly beautiful combination of white carnations, autumn leaves, palms, ferns, and other greens, and during the ceremony the young couple stood beneath a large horse-shoe, consisting of white chrysanthemums, and representing the good wishes of the Misses Stewart of Brook Hill.

The ribbon bearers were little Miss Avis Walker, and Masters Dugold Walker, Norvell Walker, and Thomas Pinckney Bryan. The entrance of these small persons with the ribbons announced the arrival of the time for the ceremony, and their part in the evening's programme was performed with all the naivet and self-possession imagnable.

The order of entrance was as follows: Messra, Stewart Bryan and William Walker, Bishop Randolph, escorted by Messra, Stewart Bryan and Walker, Misses Mary Williams and Bertha Randolph walker, Messra, Winslow Randolph and Allan Tuibott; Mr. Bryce Stewart Hume, accompanied by his best man, Mr. Robert Bryan; Miss Evie Walker, maid of honor.

The bride, in an exquisite costume of white brocaded silk, white chiffon and whith those sandth mat that record it yet reme that record it yet reme are given with the record and weight man and a remail number of very intimate friends whith those sandth mat that record it yet reme are given whether and only in the friends whith those sandth mat that record it yet reme are given whether and only in the friends whith the send with the record it yet reme are given whether and only in the friends whith the send with the record it yet reme are given whether and only in the friends whith the sandth The residence of Major D. N. Walker

honor.

The bride, in an exquisite costume of white brocaded silk, white chiffon and point lace, and carrying a small prayer book, from between whose leaves two or three sprays of liles of the valley drooped, entered, leaning upon the arm of her father, and looking "all things fair and all things sweet."

ed, entered, leaning upon the arm of her father, and looking "all things fair and all things sweet."

The wedding march was that from "Lohengrin," to which so many lovers have started upon life together.

Bishop Randolph performed the ceremony, which is so intrinsically beautiful and added to its own beauty the force and charm of his personal eloquence. Immediately after the ceremony, Mr. and Mrs. Hume left for a southern tour, which will include Florida, and which will be of several menths' length Hearty and many good wishes follow them and will welcome them upon their return. Miss Evic Walker, maid of honor, wore white crepe de chene, and carried a bouquet of white chrysanthemums. The bridesmarks—Misses Mary Williams, Berta Wellford, Bertha Randolph, Mamie Baughman, Lulla and Mabel Walker—all wore white, and their flowers were also chrysanthemums. Mrs. Walker, mother of the bride wore black crepe de chene, and Mrs. Hume, grandmother of the

UNCLE SAM'S MAGNET.

WONDERFUL INVENTION OF COL.

KING OF THE ENGINEER CORPS.

KING OF THE ENGINEER CORPS.

Among the relatives of the family present were Mr. and Mrs. Joseph Bryan. the Misses Stewart. Brook Hill; Dr. and Mrs. C. V. Carrington, white creps and Mrs. C. V. Carrington, with the Misses Stewart. Brook Hill; Dr. and Mrs. C. V. Carrington, Mr. and Mrs. E. A. Baughiman and Masters Percy and David Grant.

The popularity of the bride has parely David Grabt.

The popularity of the bride has rarely ever been attested by a more coatly and handsome collection of wedding presents that those made to Miss Walker. They were not morely summerous, but valuable, beautiful, and in faultiessly elegant taste.

ON FAMILY BEEAKFAST. A Practical L cture at the Pure Food

Exposition. a large crowd attended the Pure Food Exposition in the Grand Lodgeroom of the Masonic Temple yesterday

afternoon.

Miss L. A. Willis, principal of the Baltimore Cooking School, assisted by E. M. Wissey, of New York, gave a practical lecture on cooking, the subject being "Family Breakfast," in which the following themes were treated Mouled wheat granules, whipped cream, liver rolls, potato omelet, pop overs, coffee. The lecture was illustrated, and some valuable practical information given the housekeepers present.

present.

the pretty booths, decorated in artistic sitle, were greatly admired by those present, and Stein's Orchestra rendered the following musical programme.

March-"Manhattan Beach" (Sousa).

Waltz-"Nightingale" (Boettger.
Medley-"Southern" (Beyer.
Gavatte-"Lover's Dream" (Casey).

Polka-"Night Latch" (Schacht).

Waltz-"The Isle of Champagne" (Faust).

Waltz-"The Isle of Champagne (Faust).
Selection-"An Evening Out" (DeWitt).
Dance-"The Watermellon" (Wilson).
Waltz-"Robin Hood" (De Koven).
March-"American Cadet" (Hall).
In the evening the big hall presented an animated appearance, and quite a number of visitors attended the Exposition. A delightful musical programme was rendered during the evening.
This afternoon at 3:30 colock Miss Willis will deliver a practical lecture on "Soup and Fish," and the musical programme during the afternoon and evening will be an attractive feature.

Action of the Fire Commissioners,

The Board of Fire Commissioners held a session on Monday evening, with President John H. Frischkorn in the chair. An investigation was held as to the charges preferred against the following members of the department: R. H. Trice, of steamer No. 5; C. B. Gilman, of steamer No. 7, and Lieutenant Mitchell, of steamer No. 7.

er No. 7.
In every instance true bills were found as charged, and Messrs. Trice and Gilman were dismissed from the service, while the place of Joynes was declared vacant. Lieutenant Mitchell was fined \$5 and the chief was ordered to repri-

The heard made the following assignments, to take effect yesterday: W. B. Shaw, of truck No. 2, transferred to No. 7 steamer, vice Gilman, dismissed; C. L. Gullett, of steamer No. 8, transferred to truck No. 2, vice Shaw, transferred; J. W. Atkisson, of steamer No. 4, transferred to steamer No. 6, vice Trice, dismissed; W. J. Lucas, of No. 6, transferred to No. 4, vice Atkisson, transferred; S. Stensberg, promoted from substitute to hoseman of No. 6, vice Lucas, transferred; R. L. Cardwell, promoted from substitute to permanent ladderman in truck No. 1, vice Bradley, transferred at last meeting; H. L. Leayne, promoted from substitute to helper of No. 5, vice Joynes.

The chief was authorized to detail two firemen to attend the pure food show at Masonic Temple.

A LATTER. DAY APOLLO. The Perfec ly. Formed Man is a Rare Cres. tura Nowadays

One man in a thousand is perfectly ormed. Every one of the other 909 has

One man in a thousand is perfectly formed. Every one of the other 309 has some defect which bars him from the list of latter-day Apollos. Scientific ideas are coming in practical play, transforming weaklings into the stature and strength befitting robust manhood and healthy, symmetrical womanhood.

The Sunday News Tribune, of Detroit, recently made an interesting incursion into the gymnasium of the Young Men's Christian Association in that city, hunting for what is aptly termed "the one thousandth man." The result of the investigation is summed up as follows:

Physical Director Studer has done a great deal to improve the condition of young and old men in this city. His success is based on his scientific ideas. He believes in the old maxim that you must have a sound body to support a sound mind. He says that if you will bring him a boy at sixteen years of age, and will agree to leave the lad in his hands for a period of four or five years, by means of regular exercise, he can accomplish almost anything, as far as that boy's body is concerned. He can change his height, his weight, and his temperament; he can equip him with a force that will be fine and robust; he will give the youth a fund of strength and energy that will fit him for withstanding any great and sudden mental or nervous shock, such as comes to all, at one or another time, in this life.

As an incident of his work he can rid his patients of the blues, regulate their livers, and stir up sluggish blood. He is the physician or arms, legs, lungs and heart, following nature's remedies: air, water, sunlight and sensible, consistant exercise.

water, sumight and sensione, consistant exercise.

When your body and you call on Mr. Studer, he begins by giving a physical examaination. It is as searching and exact as science. Nothing is left to chance. He jots down twenty or thirty important items which tell the story of your physical life. Next, he takes a small sheet of paper, ingeniusly arranged in parallel and horizontal squares, and records thereon in fine, straight strokes mal standard. That narmal standard is the very substantial perfection of the imaginary one thousandth man. In other words, 11,000 men, of all ages and conditions of life, were carefully measured, a general average struck, and the result is made the basis of all the records of the school. Never yet, on first measurements, on entering the school, has a subject presented himself whose bodily perfection chanced to score accurately with those of the very perfect one thousandth man. In one or two instances that record has been approached; but it yet remains to be duplicated.

The measurements of the approximately perfect "one thousandth man" will interest every lover of his race. They are given as follows:

Dr. McCosh Seriously III.

PRINCETON, N. J., Nov. 6.—Ex-President James McCosh, of Princeton University, is critically ill at his residence in Prospect avenue. He has been growing noticeably more feeble this fall, and the weakness resulting from old age has been increased by a heavy cold, which threatened pneumonia. Two trained nurses and the family physician. Dr Wyckoff, are constantly in attendance.

Prayers were offered for his recovery at the chapel services on Sunday. Dr. Joseph Cook, of Boston, who conducted the afternoon service, spoke at some length of Dr. McCosh's splendid career, and alluded very feelingly to the love and veneration in which the students and alumni of the college held their great friend and benefactor.

CHINA ADMITS DEFEAT.

SHE APPEALS TO THE POWERS TO INTERVENE.

Willing to Abandon Her Sovereignty Over Korea and to Pay a War Indemnity. A Frank Confession.

LONDON, Nov. 6 .- A dispatch to the Times from Tien Tsin says that the representatives of all the powers were assembled on Saturday last by the Tsung La Yamen, to hear the Chinese Govern-ment's statement respecting the critical situation of affairs. Prince Kung, presi dent of the Tsung Li Yamen, the dispatch acids, calmly avowed the impotence of China to withstand the Japanese attack, and appealed to the Powers to intervene saying that China was willing to abandon her sovereignty over Korea, and to pay a her sovereignty over Korea, and to pay a war indemnity. The ministers applauded the frankness of this appeal, and prom-ised to support China's appeal to their respective Governments, with a view to the restoration of peace, in order to avert the dangers threatening all interests. The French minister, it is believed, is taking a leading part in the proposed interven-tion.

FLEEING FROM THE JAPANESE. The Chinese Army Has Been Thrown Into

LONDON, Nov. 6.—A dispatch to the Central News from Shanghal says the Chinese army has been thrown into a panic by the Japanese victories and are still fleeing before the Japanese.

The Chinese troops in Manchuria are robbing the natives and committing horrible atrocities wherever they pass. The Japanese, on the other hand, are treating the Chinese well, and are, consequently, received with open arms by the natives, who are furnishing them with supplies of various kinds.

COUT TER IMPOSTANT MOVEMENT.

also states, has been ordered to Pekin.

ANTARE IMPOUTANT MOVEMENT.

WASHINGTON, Nov. 6.—A short cable-gram received by Secretary Gresham from United States Minister Denby at Fekin chronicles another important forward movement by the Japanese. It reads:

"Javanese have taken Foo. Chow in Gulf of Liastno, approaching Shangkian, Shan Kian Kuan. Two campaigns against Moukden and Tien Tsin.

(Signed) DENBY "
All this means, according to the interpretation arrived at by the State Department officials, that the Japanese have seized the important strategic port at Kinshow, near New Chang, and on the railroad leading in one direction towards Tien Tsin and in the other toward the Manchurian capital, Moudken. The latter is thus threatened from two sides, as the Japanese forces which crossed the Yalu the Trom Korea are advancing rapidly from the southwest upon this doomed capital, and according to Minister Denby's cablegram another force will start northward from Kin Chow to Join them. The distance from Kin Chow to Join them. The distance from Kin Chow to Join them. The only about two hundred miles, and the roads are the best in China. Tien Tsin is well fortified, but should it fall the way to Pekin, the Chinese capital, would be open to the invaders.

LONDON, Nov. 6.—A dispatch from Shanghal to the Central News says all the foreigners residing in Port Arthur have arrived at Chee Foo. An attack is now being made on Port Arthur by the Japanese torpedo hoats, and it is expected that Tailen Wan will be attacked during the day.

CAPT, COOPER APPOINTED. Made Superintendent of the United States Naval Academy.

WASHINGTON, Nov. 6.—Secretary Her-bert to-day issued the formal order retiring Admiral Gherardi, the senior admiral of the navy and commandant of the New York navy yard, on the 10th instant. The following details were also made: To be superintendent of the Navy Acad-emy, Capt. Phip Cooper, now in com-mand of the United States steamer San

The President was very desirous of baving a young man appointed as super-intendent of the Naval Academy, believe The President was very desirous of baving a young man appointed as super-intendent of the Naval Academy, befieving that a young man would infuse more life and energy into the academy. Desiring to carry out the policy indicated by the President, who had no preference for any particular officer, but wanted a young man, the Secretary selected Captain Cooper, who is one of the youngest captains, being nearly at the bottom of the captains, being nearly at the bottom of the captains' list, believing that no more efficient officer could be found.

The Secretary expects to detail Admiral Walker to the Lighthouse Board to succeed Admiral Greer, who will shortly retire. In the meantime Admiral Walker will be given some other duty.

Commodore M. Sicard has been detailed as commandant of the New York yard to succeed Admiral Gherardi.

as commandant of the New York yard to succeed Admiral Gherardi.
Commodore R. L. Phythian detailed superintendent of the Naval Observatory, to relieve Captain Menair.
Capt. Allen V. Reed ordered to command the Portsmouth navy yard.
Capt. E. M. Sheppard to command the San Francisco.

Capt. E. M. Sheppard to command the San Francisco. Capt. H. F. Picking to command the Minnesota.

Commander C. S. Norton to command the South Atlantic equadron.

Another Negro Stevedore Shot to Death by a Mob of White Men.

ORLEANS, Nov. 6.-John H. Adams, a colored stevedore for the firm Adams, a colored stevedore for the firm of Allen, Hays & Co., who was engaged in loading the ship William Cliff at Southport, the terminus of the Illinois Central railroad, immediately above New Orleans, was shot this morning by the white laborers and mortally wounded. Adams was on the steamer when the mob of white men came up. They opened are on him and Gould, another negro, and they field. Adams was shot in the side, receiving twenty wounds. There is little likelihood of his recovering. In consequence of this state of affairs and other threats the negroes refused to work on the shipping this morning, declaring that their lives were in danger and that the police would not give them protection. They announced, therefore, that they would not work until after the election, as they thought that the race excitement, now so bitter, might cool down then and some protection might be obtained through the United States Courts.

The fire yesterday, it is now known, was of incendiary origin, as a ferry-boat pilot saw it when it started under the wharf. The fire has already caused severe loss to the business here, as several insurance and shipping firms threaten to withdraw. There is talk of the Cotton Exchange calling on the Governor to order out troops to suppress the lawlessness that has existed on the levee for some days on the part of the white laborers engaged in loading vessels. The colored workmen, whose property was destroyed by the mob on October 28th, have brought suit against the city for damages for failing to give them proper police protection, of Allen, Hays & Co., who was engaged

A Famous Year.

Oliver Wendell Holmes was born on August 29, 1809. William E. Gladstone was born on December 28, 1809. That is a famous year in biography. Charles Darwin was born on February 12, 1809. Edgar Allan Poe was born on February 19th. Alfred Tennyson was born in the same year; so was Pierre Joseph Proudhon, the French social philosopher. It is a year famous in the annals of military history, too, for Marshal Canrobert, the surviving French marshal, was born in that year; so was Leopold O'Donnell, the Spanish general; so was Frederick von Beust, the Austrian statesman, whose power in German affairs was eclipsed at Sadowa. The Italian statesman, Hicasoli, was born in Plorence on March 9, 1809. Park Benjamin, who died in 1864, was born in the same year. For Americans it will always be memorable as the year in which Abraham Lincoln was born.

The death of Dr. Holmes has called up a flood of reminiscences on the subject of old men. Titian, the Italian painter, was one hundred years old when he died up a flood of reminiscences on the subject of the Royal Society at the age of eighty-three, and Landor finished his 'Imaginary Conversations' at the age of eighty-nine. Brougham was a debater at eighty, and Lyndhurst, when over ninety, spoke in the House of Lords. Franklin was Governor of Pennsylvania at the age of eighty-time. Marshal McMahon was eighty-five when he died. Neal Dow is now in his ninetieth year. David Dudley Field was eighty-nine when he died. Chevreul, the French chemist, was one hundred and two when he died in 1890.

HIS RHEUMATISM CURE.

Already Twenty-Eight Persons Report Themselves Cured, and Every Mail Brings Testimony as to the Efficacy of These Little Pellets.

Although but two days have elapsed since the beginning of the free distribution of Munyon's Rheumatism cure, 2.89 samples have been given away, and many persons have called to report their almost miraculous recovery from this dread disease. Munyon's representative does not seem surprised at such sudden results, and simply remarked: "It is so in every city where our remedies have been introduced." Munyon's Remedy Company is the only one in the world who give their cures to the public absolutely free and invite the press to publish all reports, good or bad, trusting in the efficacy of their remedies to show their value. They do not ask for your money until 10,09 sufferers have proved their virtue.

In this way alone have they obtained, for the first time in the history of medicine, the indersement of the daily press of this country.

Experience has taught us that the old way of doctoring is wrong.

The hand scythe has given away to the mowing machine; the stage coach to the steam cars; the tallow dip to the electric light. So it must be with medicine-big doses of calomel, quinine, etc., must step aside for Munyon's more humane, gentle and effective treatment.

RHEUMATISM CURED. Munyon's Rheumatism Cure is guaranteed to cure rheumatism in any part of the body. Acute or muscular rheumatism can be cured in from one to five days. It speedly cures shooting pains, sciatica, lumbago and all rheumatic pains in the back, hips and loins. It seldom fails to give relief after one or two doses, and almost invariably cures before one bottle has been used.

STOMACH AND DYSPERSIA CURE. Monyon's Stomach and Dyspepsia Cure cures all forms of indigestion and stomach troubles, such as rising of food, distress after eating, shortness of breath and all affections of the heart, caused by indigestion, wind on the stomach, bad taste, offensive breath, loss of appetite, faintness or weakness of stomach, headache from indigestion, soreness of the

faintness or weakness of stomach, headache from indigestion, soreness of the
stomach, coated wongue, heartburn, shooting pains of the stomach, consupation,
dizziness and lack of energy.

Munyon's Nerve Cure cures all the
symptoms of nervous exhaustion, such
as depressed spirits, failure of memory,
restless and sleepless nights, pains in the
head and dizziness. It cures general
debility, stimulates and strengthens the
nerves and tones up the whole body.
Price 25 cents.

Munyon's Kidney Cure cures pains in
the back, loins or groins, from kidney
disease, dropsy of the feet and limbs,
frequent desire to pass water, dark colored and turbid urine, sediment in the
urine and diabetes.
Price 25 cents.

CATARRH CURE.

CATARBH CURE.

Catarrh Positively Cured.—Are you willing to spend 50 cents for a cure that permantly cures catarrh by removing the cause of the disease? If so, ask your druggist for a 25-cent bottle of Munyon's Catarrh Cure and a 25-cent bottle of Catarrh Tablets. The catarrh cure will readicate the disease from the system and the tablets will cleanse and heal the afflicted parts and restore them to a ratural and healthful condition.

Munyon's Liver Cure corrects headache, billousness, jaundice, constipation and all liver diseases.

Munyon's Could Cure provents pneumonia and breaks up a cold in a few hours.

Munyon's Could cure stops coughs, night sweats, allays soreness and speedily heals the lungs.

Munyon's Female Remedies are a boon to all women.

Munyon's Headache Cure stops head-

Munyon's Female Remedies are a boon to all women.

Munyon's Headache Cure stops headache in three minutes.

Munyon's Pile Olintment positively cures all forms of piles.

Munyon's Asthma Cure is guaranteed to relieve asthma in three minutes and cure in five days.

Munyon's Blood Cure eradicates all impurities of the blood.

Munyon's Vitalizer imparts new life, restores lost powers to weak and debilitated men. Frice \$1.

Munyon's Homeopathic Remedy Company put up specifics for nearly every disease, mostly for \$5 cents a bottle.

Sold by all druggists.

A good break of bright and dark tobaccos at Davenport's warehouse for tomorrow.

A large and a fine break at the "Southern" for to-morrow.

A good break of loose tobaccos at Shelburne's warehouse for to-morrow.

The "Stonewall" tobacco warehouse has
the first sale to-morrow.

The Petersburg Record of Monday, November 5, 1894, says:

The exports of manufactured tobacco
from the port of Petersburg during the
month of October amounted to 548,915
pounds, aggregating a tax of \$32,334,90.

This is one of the largest monthly exportations of the year, and fully sustains the reputation of Petersburg, as
by far the largest export tobacco port
in the United States.

The following will show the movement
of tobacco during the past week at the
various warehouses: Farmers—inspections, 11; receipts, 10; loose, 25,125, Oaks—
Inspections, 83; receipts, 34; loose, 14,500,
